Gore Mtn, Johnsbury, NY

Sunday, February 12

9 A.M.

5K U16/U18 Boys and Girls, 15K Men and Women

Classic

5K loop, Interval start

<https://www.skireg.com/hurt-athon>

Forecast/Conditions: Overnight low of 22, temperature at start 22. A 55 percent chance of snow beginning overnight, continuing through race time. Manmade snow mixed with natural snow, machine groomed surface.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
