

# WAX RECOMMENDATION

## Owl Creek Chase - Updated!

Aspen, CO

Snowmass Touring Center to Aspen Nordic Center

Sunday, February 12

9 A.M. 21K Classic, 9:30 A.M. 21K Skate

10 A.M. 15K Tour

Point to point

<http://www.owlcreekchase.com/>

**Forecast/Conditions:** Overnight low 27, 100 percent chance precipitation, rain changing to snow overnight 1-3 inches. Temperature at start 31, dirty transformed snow mixed with new snow. Partly sunny.

**Glidewax:** Apply LF Black, scrape and brush, then apply either HF Red/HF Yellow mixed 1:1 or HF Black, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Yellow, corking between layers. Make sure to check the Toko tent for an up-to-date kick wax recommendation.

**Structure:** A fine linear grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
