10:45 A.M. 35K Freestyle, 2 laps

1:30 P.M. 13K Freestyle, 1 lap

Mass start on a 14K loop course

<https://vasaloppet.us>

Forecast/Conditions: Overnight low of 26 rising to 30 for the early races and high 30s for the PM race. Calm winds and mostly cloudy. Freeze/thaw cycle from Friday should make for a course that starts fast and stays fast until the PM race. Expect a solid course with a few thin spots that will have manmade snow mixed in.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. For the PM race, substitute HF Yellow and JetStream Yellow.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply additional layers of Nordic GripWax Yellow, corking between layers. Cover with a final layer of GripWax Red.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
