

# WAX RECOMMENDATION

## IMD Junior National Qualifier Freestyle Sprint

Rendezvous Ski Trails, West Yellowstone, MT

Saturday, February 11

10 A.M. Qualification, Heats to follow

Skate, Sprint Course

[www.intermountainxc.com](http://www.intermountainxc.com)

**Forecast/Conditions:** Freezing rain/snow mix early Friday turning to snow after 11 A.M. with 1"-2" expected. Overnight mostly cloudy with low around 20. Saturday a 40 percent chance of snow and mostly cloudy with high around 26. Expect a race time temperature between 20-25.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. IMD rules: U16 and under must use Non-Fluoro (NF) waxes only. No LF, HF or topcoats. U16 and under, apply NF Red, scrape and brush.

**Gripwax:** n/a

**Structure:** A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions. Check Toko easel board for updates.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
