

WAX RECOMMENDATION

TOKO[®]

North American Vasa Classic

Timber Ridge Resort, Traverse City, MI

Sunday, February 12

9 A.M. See web page for wave starts

34K/16K/6K, Classic

<http://Vasa.org>

Forecast/Conditions: Overnight low of 26 at 6 A.M. rising to 35 at noon. Rain/snow likely during the race. Expect a hard pack trail of glazed snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (356F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Red and Base Wax Green, corking between layers. Final layer should be Red.

Structure: A Universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Nick Baic, Toko Tech Team member since 2007.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
