

WAX RECOMMENDATION

Washington Biathlon Association Race 8

Stevens Pass Nordic Center, WA

Sunday, March 12

10:30 A.M. Zeroing, 11:30 A.M. Race

10K Women, 12.5K Men

Sprint Format

<http://www.wabiathlon.org>

Forecast/Conditions: Overnight low of 30 rising to around 36 at race time with a day time high of 40. A 50 percent chance of rain with potential winds during event is the prediction as of Thursday A.M. Continue to monitor the forecast for changes prior to waxing.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Should also be a good day for HelX Yellow 2.0.

Gripwax: NA

Structure: A warm and wet structure or apply one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Created by David Ford, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
