

WAX RECOMMENDATION

Black Mountain Classic

Bluffs on Black Lake, Cheboygan, MI

Saturday, March 4

10 A.M.

31K Classic

Mass Start

NordicSkiRacer.com

Forecast/Conditions: Overnight low of 6F at 6 A.M. Start temperature of 19, rising to 25 at noon. Expect mostly sunny skies with little chance of precipitation.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, heat in Nordic Base Wax Green, smooth, let cool. Then apply 4 layers of Nordic GripWax Red, corking between layers. Cover with 1 layer of Nordic GripWax Blue and cork smooth.

Structure: A universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by Nick Baic, Toko Tech Team member since 2007.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
