

WAX RECOMMENDATION

Race For Diamonds

Bear Basin Nordic Area, McCall, ID

Saturday, March 18

11 A.M.

5K/3K/1K Skate with Terrain Park

Mass start

1 loop

www.mccallnordic.com

Forecast/Conditions: Highs in the 40s throughout week with rain and possible snow on Thursday. Friday night low of 37, race start temperature of 46 and a 70 percent chance of rain. Moist transformed snow with patches of dirty snow.

Glidewax: Juniors: Apply NF Black, scrape and brush, then apply NF Black/NF Yellow mixed 1/1, scrape and brush.

For those wanting faster skis, apply LF Black, scrape and brush, then apply HF Black/HF Yellow mixed 1/1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. If possible, warm up on a second pair of skis to avoid accumulating dirt before race.

Structure: A wet or universal grind covered by one pass with the Yellow Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
