

WAX RECOMMENDATION

Aspen Silverboom

Snowmass Cross Country Center, Aspen, CO

Sunday, March 5

10 A.M.

20K/10K/5K Skate

Mass start

More info [here](#)

Forecast/Conditions: Saturday night low of 25 warming rapidly under mostly sunny skies to the upper 30s by race start. Currently, new cold snow, but with warmer temperatures and sunny skies the old snow is starting to show through. Our return to winter has ended.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow mixed 1/1 with either HF Black or HF Red, scrape and brush. Finish by crayoning JetStream yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
