Snow Mountain Ranch, Granby, CO

Sunday, March 12

9 A.M.

50K/25K/10K Classic

Mass start by distance

Point to Point, finishing at Granby Ranch

More info [here](#)

Forecast/Conditions: Saturday night low in the mid-20s with a chance of snow. Race start temperature in the low 30s with a 30 percent chance of snow in the morning. Breezy and partly cloudy conditions.

Glidewax: Apply LF Black/LF Blue mixed 1:1, scrape and brush, then apply HF Red/HF Yellow mixed 1:1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Currently we are expecting klister conditions. Roughen base with 150 grit sandpaper, apply a thin layer of Nordic Base Klister Green, heat, and spread smooth. We will be testing kick wax Saturday morning. Check at the Toko tent Saturday afternoon or Sunday morning for an updated grip wax recommendation. We will also try to post an updated tip Saturday evening.

Structure: A fine linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
