Holiday Inn West Yellowstone Rendezvous Race

Rendezvous Ski Trail, West Yellowstone, MT

Saturday, March 4

8:45 A.M. 25K Classic

9 A.M. 50K/25K/10K/5K/2K Skate, Wave start

Single lap for all races except 2 x 25K lap for 50K

www.skirunbikemt.com

Forecast/Conditions: Overnight partly cloudy with low around 18. For race day, a chance of snow and later rain showers with temperature at start around 25 and pushing into lower 30s by noon. Expect clean packed powder snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. For optimal skis, spray HelX 2.0 Red on top of finished JetStream and let dry.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply a full layer of Nordic GripWax Red followed by a full layer of GripWax Yellow. Lightly cover with Red, then add a short layer of Yellow in the middle and cover with a short light layer of Red. Cork between each layer.

Structure: A fine linear structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Ian Harvey, Toko US Brand Manager.

Check the [Wax Tips](http://TokoUS.com) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
