

WAX RECOMMENDATION

Bjornloppet Classic

Bear Valley XC, Bear Valley, CA

Sunday, March 12

10 A.M.

10K/5K, Diagonal stride only

Mass start

2 laps

<http://www.bearvalleyxc.com>

Forecast/Conditions: Overnight low 32, temperature at start 38, high of 52. Transforming/transformed snow. Mostly sunny with a light breeze.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Yellow mixed 1/1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad, and/or finish by spraying an even layer of HelX 2.0 Yellow, let dry and ski. Do not brush or polish HelX.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, cork smooth, let cool. Then apply 1 thin layer of Nordic Klister Red, let cool completely before skiing.

Structure: A universal warm/wet structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2003.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
