

WAX RECOMMENDATION **TOKO**[®]

WYSEF U16 Juniors Race -- Updated!

Rendezvous Trail, West Yellowstone, MT

Sunday, December 3

1 P.M.

5K Classic technique; Mass start, 5K lap

www.skirunbikemt.com/supertour

Forecast/Conditions: Overnight a 90 percent chance of light snow with low around 25. Accumulation of 1-3 inches expected. Sunday snow likely, mostly cloudy with high near 31. Temperature at 1 P.M. start around 29. Expect packed powder over a transformed base.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers. Check Toko tent for updates.

Structure: A universal structure will best suit these conditions. Cover structure with 1-2 passes with the Red Structurite tool (before JetStream application) if fresh snow has relatively high moisture content or if tracks are very glazed.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
