Michigan Tech Nordic Ski Trails, Houghton, MI

Sunday, December 17

9 A.M. Men 15K, 10:30 A.M. Women 10K

Noon U16 5K

5K lap, Classic, Mass start

michigantechrecreation.com/trails/Ski_Races/index

Forecast/Conditions: Saturday night chance of snow showers. Cloudy, with a low around 18. Sunday cloudy with race temperature steady 27-29. Expect fresh powder to be packed and machine worked into a moderate track. Tracks will glaze due to high traffic.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow/HF Blue mixed 1:1, scrape and brush. The Yellow will run well in these conditions and the Blue will help harden the base. MW/GLD JNQ rules state no topcoats in Classic races.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Yellow, corking between layers.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
