

WAX RECOMMENDATION

Bogus Basin Challenge #1

Bogus Basin, Boise, ID

Sunday, December 31

10 A.M.

10K/5K Skate

Mass start

2 loops

<https://www.bbnt.ski>

Forecast/Conditions: Overnight low of 18, predicted start temperature of 26 with high of 30. Packed untransformed snow, 15 percent cloud cover, 10 percent chance of new precipitation, 65 percent relative humidity. There is a 50 percent chance of new snow Friday.

Glidewax: Junior Racers: Apply NF Black, scrape and brush, then apply NF Red, scrape and brush.

For Fastest Skis: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
