

WAX RECOMMENDATION

Grand Mesa Classic

Skyway Trailhead, Grand Mesa, CO

Saturday, December 30

11 A.M.

8K Classic, out-and-back course due to low snow.

More info [HERE](#)

Forecast/Conditions: Overnight low 21 warming to 35 at start under mostly sunny skies. Snow coverage is meager so the tracks will not be perfect and will be non-existent in places.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Blue mixed 1:1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers. Mix in layers GripWax Yellow for more kick.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
