

WAX RECOMMENDATION

New Year's Relay

Touring Center, Steamboat Springs, CO

Sunday, December 31

10 A.M.

Skate/Classic Team Relay, 3 x 7.2K

Mass start

More info [HERE](#)

Forecast/Conditions: Overnight low of 12 warming to 23 at start under mostly sunny skies. Slight chance of snow Saturday night. Snow coverage is still thin.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning in JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 thin layers of Nordic GripWax Red, corking between layers, and cover with a thin layer of GripWax Blue, corking lightly.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
