

# WAX RECOMMENDATION

## Snowshoe Thompson Classic

Auburn Ski Club, Soda Springs, CA

Sunday, December 31

9:30 A.M.

10K/5K, Diagonal stride only

Interval start

Multiple laps

[www.auburnskiclub.org](http://www.auburnskiclub.org)

**Forecast/Conditions:** Overnight low 27, temperature at start 38, high temperature 46. Old, sugary and granular snow. Partly cloudy skies with light breeze.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, smooth, let cool. Then apply 1 thin layer of Nordic Klister Red/Blue mixed 2:1. Smooth, let cool, then go ski.

**Structure:** A universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
