

WAX RECOMMENDATION

TOKO[®]

Tour de Michaywe'

Michaywe' Golf Course, Gaylord, MI

Saturday, December 30

10 A.M. Pursuit, 3K Classic, 8K Skate

2 P.M. 6.5K Classic uphill, 2 laps

<http://nordicskiracer.com>

Forecast/Conditions: Overnight low of 4F with temperature at start of 6F and a high of 10F at 2 P.M. There is a 60 percent chance of new snow overnight and a 35 percent chance during the race. Course should be soft, packed powder.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (20 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in a thin layer Nordic Base Wax Green, cork smooth, let cool. Then apply 3 thin layers of Nordic GripWax Blue, corking between layers. Finish with 1 layer of Nordic GripWax X-Cold and cork smooth.

Structure: A fine linear grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
