

WAX RECOMMENDATION **TOKO**[®]

West Yellowstone Biathlon Pursuit Race

Rendezvous Ski Trail, West Yellowstone, MT

Sunday, December 10

11 A.M. Start

12.5K/10K/7.5K Race Distances

<http://www.skirunbikemt.com/events.html>

Forecast/Conditions: Overnight mostly clear with low around 3F. Saturday sunny, temperature at start in mid-20s. Expect a firm track and transformed snow conditions.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Junior skiers use NF Blue or LF Blue, scrape and brush.

Gripwax: n/a

Structure: A medium/universal structure will best suit these conditions. If skis have a very fine structure, cover with one pass with the Red Structurite tool (before JetStream application).

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
