

# WAX RECOMMENDATION

## Winter Warm Up

Elm Creek Park Reserve, Maple Grove, MN

Saturday, December 23

8:30 A.M.

10K/5K, Skate

Mass start on a 2.5K course

More info [here](#)

**Forecast/Conditions:** Overnight low and race time temperature of 9F. Expect a packed racing surface of primarily manmade snow on top of a substantial base of manmade snow. Uphills could become sugary for later skiers.

**Glidewax:** Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

**Racing - Service**

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
