

WAX RECOMMENDATION

Betty Woolsey Classic Race

Trail Creek Ranch, Wilson, WY

Saturday, December 30

10 A.M.

10K, Classic technique

Mass start

Forecast/Conditions: Overnight snow flurries, low 30s temperature. Trails are packed but expect some grass and dirt coming through. Temperature at race time in the mid-30s, possible snow/rain mix.

Glidewax: Apply LF Black scrape and brush. Apply HF Red/HF Yellow mixed 1:1. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. If cooler temperatures hold, a mix of Nordic GripWax Red and Yellow will be solid. If using skin skis, see our [skin treatment options](#) for best results.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](#).
