11:45 A.M. 24K Classic, 12:30 P.M. 24K Skate

Wave starts, 10 minute waves

www.noquemanon.com

Forecast/Conditions: Friday night mostly cloudy, with temperature falling from 40 to 30 overnight. Saturday mostly sunny, with race temperatures ranging from 30-34 along the course during the day. Recently fallen dry snow will be machine worked and packed into the base Thursday night.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow and HF Red mixed 2:1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, cork smooth, let cool. Then apply a layer of Nordic Klister Red with 6-8 drops of Nordic Klister Yellow underfoot, cork smooth, place outside to cool. Lastly, apply 1 layer of Nordic GripWax Red and lightly cork smooth, being careful to avoid mixing into Klister.

Structure: A universal grind covered by one pass with the Yellow Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
