

WAX RECOMMENDATION **TOKO**[®]

Race For Diamonds

Ponderosa State Park, McCall, ID

Sunday, January 7

11 A.M.

5K/3K/1K, Skate or Classic

Mass start

1 loop

www.mccallnordic.com

Forecast/Conditions: Saturday night low of 15, 22 at start, 90 percent cloud cover, 80 percent relative humidity and a 30 percent chance of new precipitation at start time. Transformed and dirty snow. An 80 percent chance of snow or rain on Saturday.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Red, corking between layers. Consider a cushion of GripWax Yellow covered with Red for more kick if track is moist.

Structure: A medium structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
