

WAX RECOMMENDATION

Boulder Mountain Tour - Updated!

Harriman Trail, Ketchum, ID

Saturday, February 3

10 A.M.

32K, Skate

Wave start, point to point

<https://bouldermountaintour.com/>

Forecast/Conditions: Overnight low of 27, possible precipitation before midnight. Race air temperature around 32. Expect tilling to bring up snow from underneath, creating an element of slower, fresher and drier snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1:1 (Elite Men and Elite Women waves) or HF Red (all other waves), scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: Choose an all-around flex ski with a cold universal finish. Follow with one pass with the Blue Structurite tool before JetStream application.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
