

WAX RECOMMENDATION

Potato Cup

Mink Creek Nordic Area, Pocatello, ID

Saturday, January 27

10 A.M.

15K/10K/5K, Skate

Mass start

1-3 Laps

<http://www.pokyxc.org/>

Forecast/Conditions: Friday night low of 19, snow likely Thursday and Friday, packed untransformed snow. Temperature of 22 at the start, 70 percent cloud cover, 20 percent chance of new precipitation during the race with 90 percent humidity.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
