

WAX RECOMMENDATION **TOKO**[®]

Teton Ridge Classic

Grand Targhee Ski Resort, Alta, WY

Saturday, January 6

10 A.M.

26K/14K Classic, Mass start

14K loop

<http://tetonridgeclassic.com>

Forecast/Conditions: Overnight low in the low 20s, temperature at start mid-20s, new, potentially heavy snowfall forecast for race day. Note course change venue to Grand Targhee Ski Resort, which is at 8,000 feet. Snow should be new, clean and soft over a firm base of tracks.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply several thin layers of Nordic GripWax Red, corking between layers.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
