

WAX RECOMMENDATION

Badger State Games

Nine Mile Forest, Wausau, WI

Saturday, January 27

See website for schedule of events, both Classic and Skate Wave starts

<http://www.badgerstategames.org/nordic-skiing/>

Forecast/Conditions: Overnight temperatures will be around 26. Temperatures will steadily rise into the low 30s as races proceed into the early afternoon, with mostly sunny skies. Expect a firm track to deteriorate and soften as the racers complete multiple laps. The track will also be highly variable with sun, shade, and variations of transformed to more fresh snow.

Glidewax: Apply LF Black, scrape and brush, early starters apply HF Red, scrape and brush, later starters apply HF Red/HF Yellow mixed 2:1. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green short (in klister zone), cork smooth, let cool. Then create a pyramid of multiple thick layers of Base Wax Green, corking between each layer. Stay short, not beyond klister zone. Simple video [here](#).

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
