

WAX RECOMMENDATION

Black Diamond Wasatch Citizens Series #3

Updated!

Mountain Dell Golf Course, Salt Lake City, UT

Saturday, January 20

10 A.M.

10K, Skate (note change)

Wave start

2 Laps

<http://www.utahnordic.com/>

Forecast/Conditions: Overnight low around 25 with more than three inches of new snow falling. Temperature at start around 31, 8 mph wind, with an 80 percent chance of snow falling during race. Expect about one inch of fresh to fall between the end of grooming and the start of the race. Underlying course is very thin and hard in some places. Final course layout will be determined early Saturday morning based on snowfall.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions. Check the Toko tent for updated structure recommendation, based on moisture and crystal sharpness.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
