

WAX RECOMMENDATION

Bridger Biathlon Pursuit

Crosscut Mountain Sports Center, Bozeman, MT

Saturday, February 3

10 A.M. Start

12.5K/10K/7.5K, Skate

Pursuit format

www.bridgerbiathlonclub.org

Forecast/Conditions: Overnight low around 27, gusty winds with heavy snow possible. Saturday an 80 percent chance of snow, temperature at start around 32. Expect soft new snow conditions, possibly wind-blown snow.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. U14 & under apply NF Red, scrape and brush. Due to the relatively high elevation and high probability of wind-blown snow, Red glidewax is recommended over Yellow.

Gripwax: n/a

Structure: A universal structure will best suit these conditions. If snow has fairly high moisture, apply 1-2 passes with the Red Structurite tool (before JetStream application or after NF Red for U14 and under).

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
