

WAX RECOMMENDATION

Carnival Classic Ski Race

Glacier Nordic Center, Whitefish, MT

Sunday, February 4

9 A.M.

12K/4K/1K races; Classic technique

Mass start

www.glaciernordicclub.com

Forecast/Conditions: Overnight low around 26 with a 50 percent chance of rain/snow mix. Sunday rain/snow mix likely in the morning with temperature at start near 33.

Glidewax: Apply LF Black, scrape and brush, then apply HF Black, scrape and brush. Finish by crayoning JetStream Red/Yellow mix, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. U14 & under, apply NF Red/NF Yellow mix 1:1, scrape and brush.

Gripwax: A very good day for mechanical bases, be that fishscales, harries or skins. If using skin skis, see our [skin treatment options](#) for best results. If that is not an option, roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, smooth, let cool. Then apply a mix of Klister Red and Klister Yellow, smooth, let cool. Cover with a layer Nordic GripWax Red, corking lightly.

Structure: A universal structure covered by 1-2 passes with the Red Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
