

WAX RECOMMENDATION

NH Coaches Series Race 2

White Mountain Regional HS, Whitefield, NH

Saturday, February 17

10:30 A.M.

5K, Skate

Wave start

1 lap

<http://www.nhnordiccoaches.org/nh-series/>

Forecast/Conditions: Low of 2F overnight, partly cloudy. Temperature rises to 15 by race start, mostly sunny. Mix of transformed and fresh snow, snowmobile groomed.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue/HF Red mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Stuart Kremzner, Toko Tech Team member since 2004.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
