

WAX RECOMMENDATION

Tahoe Mountain Sports President's Cup

Auburn Ski Club, Soda Springs, CA

Monday, February 19

10 A.M.

10K and 5K, Freestyle

Wave start

Multiple laps

www.auburnskiclub.org

Forecast/Conditions: Overnight low 16, temperature at start 26, high temperature 30. A 20 percent chance of new snow on Sunday going into Monday. Mostly cloudy and windy, keeping snow cooler than air dictates.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Blue mixed 1:1, scrape and brush. Finish by crayoning JetStream Red iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A universal grind covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2004.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
