

# WAX RECOMMENDATION

## The Tour of Bogus

Bogus Basin, Boise, ID

Sunday, February 11

10 A.M.

22K/10K/3K Skate

Mass start, 1 loop

<https://www.bbnt.ski/race/>

**Forecast/Conditions:** Overnight low of 21, 26 degrees and sunny at start with a high of 32. Transformed snow with good cover but an occasional dirt patch, 30 percent cloud cover, 40 percent relative humidity.

**Glidewax:** Juniors: Apply NF Black, scrape and brush, then apply NF Red, scrape and brush. For others, apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Structure:** A universal structure covered by one pass with Red and then Blue Structurite tools (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
