

WAX RECOMMENDATION

White Pine Stampede

Schuss Mountain, Bellaire, MI

Saturday, February 3

9:30 A.M. 10K Skate/Classic

10:30 A.M. 20K Skate/Classic

5K lap

<http://whitepinestampede.org>

Forecast/Conditions: Overnight low of 10F with temperature at start of 13. Expect 5-8 inches of new snow in the previous 24 hours and falling snow during the race. Conditions should be soft packed powder.

Glidewax: Apply LF Black, scrape and brush, then apply HF Blue, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (20 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Red and GripWax Blue, corking between layers. Final layer should be Blue.

Structure: A fine linear grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
