50K Free, 25K Free & Classic, 10K, 5K & 2K races

25K lap for 50K race

www.skirunbikemt.com

Forecast/Conditions: Friday 3"-5" of new snow expected.

Overnight low around 8F. Saturday partly cloudy with temperature at start around 11F. Snow should be relatively clean, cold and dry. High in the mid 20s by mid-afternoon.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply several layers of Nordic GripWax Blue. For those who desire extra kick or plan to be on course for several hours, apply 1-2 very thin layers of GripWax Red followed by several thin layers of Nordic GripWax Blue, corking between layers.

Structure: A fine to fine-universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
