

WAX RECOMMENDATION

Barkeater Chocolates HURT-athon

Gore Mtn., North Creek, NY

Sunday, February 11

9 A.M.

5K U16/18 Boys, Girls; 15K all others

Freestyle, Mass start

<https://www.skireg.com/hurt-athon>

Forecast/Conditions: Overnight low 26, temperature at start 31, machine groomed, packed powder surface. Cloudy with chance of snow and/or freezing rain.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A wet grind covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
