Stevens Pass Nordic Center, 5 miles East of Stevens Pass, WA

Sunday, March 11

10:30 A.M. Zeroing, 11:30 A.M. Race

15K Men, 12.5K Women

Individual start

See website for details

<http://www.wabiathlon.org>

Forecast/Conditions: Saturday night low of 27 with a Sunday high of 41 under partly sunny skies. Snow temperature should be close to 32 by race time.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: NA

Structure: A Universal or warm structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions. If the sun is out and snow temperature nears 32, an additional onsite pass with the Yellow Structurite tool, brushing, then following with an application of HelX 2.0 Yellow would provide additional benefit.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
