

WAX RECOMMENDATION

Alpenglow 20K

Tahoe XC, Tahoe City, CA

Sunday March 4th, 2018

10 A.M.

20K, 10K, 2K Freestyle

Mass start

1 loop 20K, 2 laps for 10K

<http://www.tahoexc.org>

Forecast/Conditions: Overnight low 10F, temperature at start 22F, high of 30F. Fresh snow, partly sunny. New, sharp snow crystals and soft tracks will keep the snow skiing cold.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/Blue 1:1 scrape and brush. Finish by crayoning JetStream Blue, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Red/Blue mix, corking between layers.

Structure: A fine to fine-universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by name Ben Grasseschi, Toko Tech Team member since 2004

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
