

WAX RECOMMENDATION

Hyalite Classic

Hyalite Reservoir Pavilion, Bozeman, MT

Sunday, March 18

10 A.M. 15K Classic, Mass start

Point-to-point race course around Hyalite Reservoir

www.bridgerskifoundation.org/events/citizens-cup

Forecast/Conditions: Freeze/thaw conditions all week with possibility of rain/snow mix. Overnight snow likely, low around 19. Sunday morning snow likely with temperature at start around 28. Expect transformed "Spring" snow conditions with some fresh snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Black, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in a very thin layer of Nordic Base Klister Green, smooth, let cool. If snow is transformed, apply Nordic Klister Red (or possibly Klister Red/Klister Yellow mix). If some fresh snow exists over a transformed base, over the Base Klister Green, crayon on a layer of Nordic GripWax Red or GripWax Red/GripWax Yellow mix. If snowing around 32, test GripWax Yellow or apply "harries" to kick zone. If using skin skis, see our [skin treatment options](#) for best results.

Structure: A universal structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions or use a ski with a warm grind.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
