

WAX RECOMMENDATION

IMD U16 Championship

Rendezvous Ski Trails - West Yellowstone, MT

Saturday March 3rd, 2018

9:17 A.M. Race Start

5K Freestyle Mass Start

www.skirunbikemt.com

Forecast/Conditions: Friday 3"-5" of new snow expected.

Overnight low around 8F. Saturday partly cloudy with temperature at start around 11F. Snow should be relatively clean, cold and dry. High in the mid 20s by mid-afternoon.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, sprinkle on X-cold Powder, iron in together, scrape and brush. Two layers of LF Blue will also work very well if skiers do not have HF Blue.

No Block or Powder Fluoro waxes are allowed.

Gripwax: n/a

Structure: A fine to fine-universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
