

WAX RECOMMENDATION

IMD U16 Team Sprint Relay

Rendezvous Ski Trails - West Yellowstone, MT

Sunday March 4th, 2018

10 A.M. Race Start

2 x 1.5K Freestyle

www.skirunbikemt.com

Forecast/Conditions: Overnight cloudy with low around 13F. Sunday partly cloudy with temperature at start around 19F. Snow should be relatively clean, cold and dry.

Glidewax: Apply LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Two layers of LF Blue will also work very well if skiers do not have HF Blue.

No Block or Powder Fluoro waxes are allowed.

Gripwax: n/a

Structure: A fine to fine-universal structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Created by Eric Mittelsteadt, Toko Tech Team member since 1999. ericm@TokoUS.com

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
