McNeill Canyon Trail System, Homer, AK

Saturday, March 10

9:30 A.M. 42K/25K, 10 A.M. 13K Tour

Freestyle

Mass start

One lap

kachemaknordicskiclub.org/event/knsc-nordic-ski-marathon/

Forecast/Conditions: Expecting 6-12 inches of snow on Thursday and one inch on Friday. Low Friday night of 21. At race start, 26, cloudy and 70 percent humidity.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red/HF Yellow mixed 1/1, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 thin layers of Nordic GripWax Red, corking between layers. Carry GripWax Yellow with you as the tracks may glaze.

Structure: A universal structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Created by Megan Corazza.

Check the [Wax Tips](http://TokoUS.com) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
