## Pepsi Challenge

Giant's Ridge, Biwabik, MN

Saturday March 3<sup>rd</sup>, 2018

9:00 A.M. Classic, 9:30A.M. Skate

50K/25K Skate or Classic

Wave start; 2 Laps

<http://www.pepsichallengeskirace.com/pepsi.php>

**Forecast/Conditions:** Overnight low of 20F, 26F at start and high of 39F, mix of transformed snow tilled with fresh snow, partly cloudy with a slight chance of snow. Night time lows warming throughout week.

**Glidewax:** Apply LF Blue, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Finish by spraying an even layer of HelX 2.0 Red, let dry and ski. Do not brush or polish.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Klister, let cool. Apply a layer of Nordic GripWax Yellow and cover with 2 thin layers of Nordic GripWax Red, lightly corking. If using skin skis, see our [skin treatment options](#) for best results.

**Structure:** A universal structure covered by one pass with Red and then Blue Structurite tools (before HelX application) will best suit these conditions.

Created by Randy Anderson, Toko Tech Team member since 2015. Randy@TokoUS.com

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
