

WAX RECOMMENDATION

Race to the Cabin

Trapp Family Lodge, Stowe, VT

Saturday, March 31

10:30 A.M.

5K, hill climb, Classic

Mass start

<http://www.trappfamily.com>

Forecast/Conditions: Friday overnight low in the high 20s, temperature at start about mid-30s. PistenBully groomed old snow, about 2K rolling then uphill to finish, all in the woods.

Glidewax: Apply LF Black, scrape and brush, then apply HF Yellow, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, heat in a thin layer of Nordic Base Klister Green, smooth, let cool. While still tacky, apply a layer of Nordic Klister Yellow and smooth.

Structure: A wet structure covered by one pass with the Yellow Structurite tool (after JetStream application) will best suit these conditions.

Created by Dave Boucher, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
