

# WAX RECOMMENDATION

## Ski, Shoe and Fatbike to the Clouds

Great Glen Trails, Gorham, NH

Sunday, March 4<sup>th</sup>, 2018

10:00A.M.

10K Classic/Freestyle

Mass start

Point to Point

<https://www.greatglentrails.com/ski-shoe->

**Forecast/Conditions:** Overnight low of 25F & mostly cloudy. Temperature at start 30F, mix of fresh and transformed snow, PistenBully groomed, mostly sunny with a high of 33F.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Yellow and HF Black mixed 1:1, scrape and brush. Finish by crayoning JetStream Yellow, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad. Finish by spraying an even layer of HelX 2.0 Yellow, let dry and ski. Do not brush or polish.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Klister Green. Then, while the Green klister is still warm, apply a mix of Nordic Klister Red and Yellow mixed 1:1, corking between layers.

**Structure:** A Universal structure covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
