

WAX RECOMMENDATION

Squirrel Hill Pursuit

Minocqua Winter Park, Minocqua, WI

Saturday, March 3rd, 2018

Wave starts from 9:00-9:15 AM

6k/18k Classic and Skate Divisions

<http://minocquawinterpark.org/skiathlon>

Forecast/Conditions: Friday night mostly cloudy, with a low around 17. Southeast wind 3 to 5 mph. Saturday mostly sunny, with race temperatures 29-35F. Expect machine worked and packed snow.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush for the classic leg. Apply HF Red and HF Yellow mixed 1:1 for the skate leg. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 short layers of Nordic GripWax Yellow, corking between layers. Finish by applying 2 full layers of Nordic GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Yellow Structurite tool (before JetStream application) will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
