

WAX RECOMMENDATION

Wilson Cup

Nordic Center, Vail, CO

Saturday, March 10

10 A.M.

20K Freestyle

Mass start

10K laps

More info [Here](#)

Forecast/Conditions: Overnight low 11, 34 at start. Mostly transformed snow with more wintry snow on the shaded sections of the course.

Glidewax: Apply LF Black/Blue mixed 1:1, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Red Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
