50K Skiathlon and 50K/25K/10K Classic and Skate

[www.greatbearchase.com](http://www.greatbearchase.com)

**Forecast/Conditions:** Friday night 20 percent chance of snow showers. Partly cloudy with low around 15. Saturday partly sunny with race time temperatures ranging 20-25. Expect clean fresh machine worked and packed powder.

**Glidewax:** Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Red depending on race distance, corking between layers.

**Structure:** A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at [TokoUS.com](http://TokoUS.com).
