

WAX RECOMMENDATION

Super Tour Finals

Craftsbury Outdoor Center, Craftsbury, VT

Friday, March 23

9 A.M. Qualifiers, 11:30 A.M. Heats

1.5K Interval start, Classic

<http://www.craftsbury.com/>

Forecast/Conditions: Thursday night low of 19, rising to 22 by first start and 32 for last heats. Mostly cloudy. Packed-powder surface.

Glidewax: Apply LF Black, scrape and brush, then apply HF Red, scrape and brush. Finish by crayoning JetStream Red, iron hot (320F) with a layer of fiberlene under the iron, traveling slowly (60 seconds) tip to tail. Brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic BaseWax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Red, corking between layers.

Structure: A fine structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Created by Rob Bradlee, Toko Tech Team member since 1999.

Check the [WaxTips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream or HelX) and substitute the LF or NF wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the How To link at TokoUS.com.
